## Technical Director OVERVIEW

### JOB SUMMARY

The technical director is responsible for technical operations relating to worship services including, but not limited to, audio, video, lighting and livestream. The technical director coordinates and trains volunteers while overseeing the direction and administration of a newly formed technical ministry team. The technical director coordinates maintenance for audio, video, lighting, projection, wiring, and related software/hardware in the buildings. The technical director also collaborates with the ministry staff for weekly support/execution and developing strategic next steps relating to budget, purchase, maintenance and upgrades of audio, visual, lighting equipment and the programs which daily interface for operational needs at all levels.

### QUALIFICATIONS

A disciple of Jesus Christ who maintains a vibrant and authentic walk with the Lord. A person who participates in the mission mandate given by Jesus to the local church and is enthusiastically engaged in creative ways to accomplish that goal. A passion for seeking excellence in ministry with an ability to recruit, train and manage volunteers in audio, video, projection, and lighting. A collaborative, team-driven individual who champions others and fosters a cooperative environment. A person with an ability to troubleshoot quickly, while functioning effectively and calmly in stressful situations.
